IMPORTANT DOCUMENT.—We present to our tence of the Union itself! readers below the message sent by the Presiassumen of all professions and all political creeds- dent to the House of Representatives, accompanying the Oregon Territorial bill, which he had just signed, in which he assigns the reasons why and wherefore he did so :-

To the House of Representatives

of the United States : When the President has given his officia sanction to a bill which has passed Congress, usage requires that he shall notify the House in which it originated of that fact. The mode of giving this notification has been by an oral message delivered by his private secretary. Having this day approved and signed an act entitled "An act to establish the territorial government of Oregon," I deem it proper, under the existing circumstances, to communicate

the fact in a more solemn form The deeply interesting and protracted discussions which have taken place in both houses of Congress, and the absorbing interest which the subject has excited throughout the Bannerman's, is due every Monday at 4 P. M., and country, justify, in my judgment, this departure from the form of notice observed in other

> In this communication with a co-ordinate branch of the government, made proper by the without reserve, express the reasons which have constrained me not to withhold my signature from the bill to establish a government over Oregon, even though the two territories of New Mexico and California are to be left, for the present, without governments. None doubt that it is proper to establish a government in Oregon. Indeed, it has been too long delayed. I have made repeated recommendations to Congress to this effect. The petitions of the people of that distant region have been presented to the government, and ought not to he disregarded To give to them a regularly organized government and the protection of thirty glorious States which constitute our our laws, which as citizens of the United States which we are bound to perform, unless there be controlling reasons to prevent it

In the progress of all governments, questions of such transcendent importance occasionally arise, as to cast in the shade all those of a mere party character. But one such question can now be agitated in this country; and this may endanger our glorious Union, the source of our greatness, and all our political blessings. This question is slavery. With the slave holding States this does not embrace merely the rights of property, however valuable : but it ascends far higher, and involves the domestic peace and security of every fam-

The fathers of the constitution-the wise and patriotic men who laid the foundation of our institutions-foreseeing the danger from this quarter, acted in a spirit of compromise and mutual concession on this dangerous and delicate subject; and their wisdom ought to be the guide of their successors Whilst they left to the States exclusively the question of domestic slavery within their respective limits, they provided that slaves who might escape into other States not recognising the institution of siavery, shall " be delivered up on

If the legislation of Congress on the subject of the other Territories shall not be adopted in a spirit of conciliation and compromise, it is impossible that the country can be satisfied, or that the most disastrous consequences shall
